AUTO TRAFFIC SPIKES

	<p>Model SM36 \$ 960.00</p> <p>www.TURNSTILES.us surface-mounted traffic controller is designed to regulate the flow of traffic through a secured control point, by providing both a visual and physical barrier. Using three 12" control modules, Our SM36 is surface-mounted, eliminating excavation and drainage problems.</p> <p>Length: Available in a 36" module (36" long x 22" wide x 2" high). Height: Ramp - 2" above grade, spikes - 2 1/4", totaling 4 1/4". Weight: 105 lbs. per 36" module.</p> <p>Features: Long life, steel alloy torsion springs (chrome vanadium), 3/8" laser-cut top plates, zinc-plated teeth, welded steel frame. Latch down kit standard on all units.</p>
	<p>SM_SAFE \$ 2,010.00</p> <p>The only Pedestrian-Safe traffic controller on the market, our SM_SAFE is designed to provide both a visual and physical barrier to approaching vehicles. Easily installed; regulates the flow of traffic through a secured control point. Pedestrian-Safe technology is designed for use in applications where pedestrian traffic will be present. Torsion springs prevent the spike from being raised by the weight of persons crossing the traffic controller.</p>
	<p>Model SM37 \$ 960.00</p> <p>Flush-mounted traffic controller is designed to regulate the flow of traffic through a secured control point, by providing both a visual and physical barrier. This unattended, one-way traffic controller will work with any width roadway by installing 36" modules end-to-end.</p> <p>Length: Available in 36" or 72" modules (36"/72" long x 8" wide x 6" deep).</p> <p>Height: Spikes - 2 1/4" above grad</p> <p>Weight: 95 lbs. per 36" module.</p>
